John Brademas giving the keynote address. "We must not fail to proclaim the centrality of education to all of our lives," he said.

Jerry C. Lee inaugurated sixth president of Gallaudet

Above, Catherine Ingold, chair of the collegiate faculty, and below, Larry Forestal, president of the National Association of the Deaf, address Lee during the inauguration ceremony.

Jerry C. Lee was inaugurated the sixth president of Gallaudet College Oct. 19 in a ceremony attended by special guests, delegates and members of the Gallaudet community.

Held at the Field House, the one and one-half hour ceremony featured salutations from spokesmen of five groups and a keynote address by John Brademas, a former congressman who now serves as the president of New York University.

Brademas, who just completed his third year as New York University's president, welcomed Lee to the "rookie team" of college and university presidents, saying that the years ahead will demand of Lee his wisdom, skill and, on occasion, his sense of humor.

"The task ahead for Gallaudet and its new president is not an easy one. Higher education faces critical challenges in the days and years ahead," Brademas said, pointing to a reduction of support from the federal government and "confusing mandates from a changing society."

"The challenges we face are far more difficult than before. We must skillfully balance the means at our disposal with the goals we seek to achieve," he stated.

Saying that trained intelligence is indispensable to the future, Brademas said "we must not fail to proclaim the centrality of education to all of our lives."

The word education, he said, is drawn from a Latin phrase which means to lead out. "For thousands of students, Gallaudet has helped lead the way out of hardship to promise, purpose and hope."

"What separates Gallaudet students from others is not their handicap but their excellent desire to achieve and serve," he continued.

Following Brademas' remarks, Jane Bassett Spilman, chairman of Gallaudet's Board of Trustees, quoted from a speech given during the May 1983 convocation honoring Edward C. Merrill, Jr., Gallaudet's fourth president.

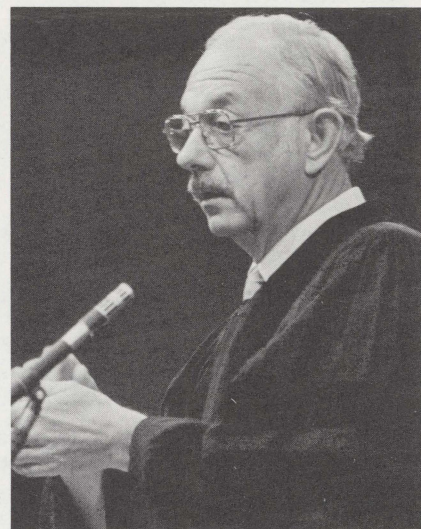

Referring to an address given by Father Timothy J. Healy, president of Georgetown University, Spilman repeated Healy's concluding remarks.

"Gallaudet," Healy said, "is, of course, a realistic place and faces real problems with the best and shrewdest tools it can buy or invent. But it is also a place that says to all of us that we as Americans believe in each other, that we have a solid national bump for learning that no handicap is a bar to the spirit of man. Whoever Pete Merrill's successor is, my one prayer for him is that along with you, he can keep this tough and graceful magic at work."

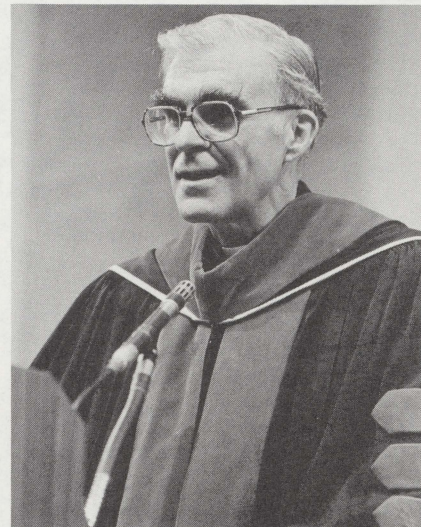

Spilman then described Lee as a "formidable administrator" and "bold and decisive leader" who has "dared to make controversial decisions, to tackle the traditional sacred cows and to implement a more streamlined organizational structure."

"His leadership role in formulating the strategic plan for the College has already made a significant impact on Gallaudet in the short term and promises to provide a clear sense of direction as we face the future," she said.

While Lee has demonstrated an unswerving commitment to quality education and has initiated innovative ideas, Spilman said that his most significant and compelling accomplishments in the last nine months have been "his sensitivity to and

Library Bits & Pieces

Archives survey project by Donna Wells

The Gallaudet College Archives was awarded \$72,000 this year by the National Historical Publications and Records Center to survey historic collections housed in residential schools for the Deaf.

The two-year project will involve on-site visits to at least 25 schools in various states throughout the country as well as the completion of a questionnaire by officials at approximately 40 other schools.

The Archives hopes to locate and identify inactive school records, personal papers, art, photographs, rare books and artifacts for research use. The end result will be a published guide for directing researchers to specific collections focusing on a particular aspect of deaf cultural history.

If you have ever utilized any of the collections housed in Gallaudet's Archives, you probably found them to be clean, well organized, identified and in a protective box. Unfortunately, many collections are not so readily accessible when found. Such care is usually provided by the Archives' staff after ac-

quiring the collection.

A survey, which often precedes the acquisition of a collection, may uncover old documents, books and visual materials in dark, leaky basements or attics after the materials are of no further use to the owner. Collections have been surveyed in barns and storerooms—hazardously packed away in boxes that provide little protection from the elements. Needless to say, it is often difficult to identify many of those items.

However, much of the damage done to such collections is attributed to man. "Worthless" items are discarded or left in unprotected areas where they can collect a healthy layer of dust, mold or mildew. This creates an environment for housing insects and rodents.

The main objective of any Archives is to preserve such materials for future use. Because the majority of these historic resources have never before been realized as such, there is an immediate need to locate and preserve materials critical for the documentation of the history of the American deaf community. Through the survey, the Archives will be able to provide information about these historic materials and encourage their preservation.

Doctoral student awarded fellowship

An international doctoral student in the Department of Administration and Supervision has received a fellowship award to conduct a study of programs and services for deaf and hard of hearing elderly persons.

The National Institute of Handicapped Research in the United States Department of Education awarded a one-year rehabilitation research fellowship of \$26,500 to Israel Sela. Sela will conduct a national investigation identifying state of the art programs and services for deaf and hard of hearing elderly persons. He will also

conduct a needs assessment and accessibility status survey of those programs and services.

Sela, whose background is in social work, has completed his course work and is beginning the final internship and dissertation activities of his doctoral studies. He expects to utilize a portion of the findings within his dissertation research.

Raymond Trybus, dean of the Research Institute, has worked as Sela's major adviser since the project began in July.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Research at x5030 (voice or TDD).

Deadline	Program
11/15/84	ACE: American Council on Education Fellowships
11/15/84	NSF: Visiting Professorships for Women
11/29/84	ED: Fund for the Improvement of Postsecondary Education
12/7/84	OSERS: Secondary Education and Transitional Services for Handicapped Youth
12/31/84	Kellogg: Kellogg Foundation's National Fellowships
Early January	ED: Mina Shaughnessy Scholars
1/15/85	NSF: Research Opportunities for Women
2/1/85	DCCHC: The Meaning of Work; Humanities and Women; Humanities and Urban Life; Humanities in the Schools

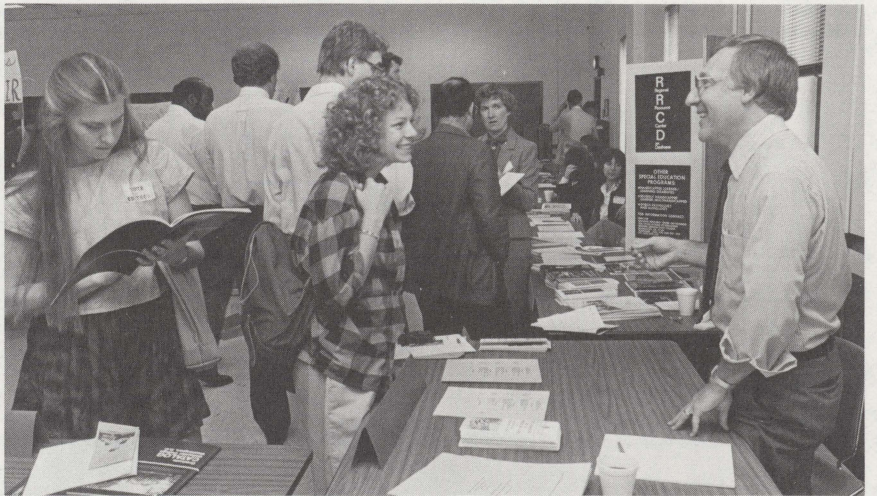

3/1/85	NCHSR: Health Care Technology Research
3/1/85	NIDA: Marijuana Research
3/1/85	NIA: Older People and Social Institutions
3/1/85	NIOSH: Research and Demonstration Grants
3/1/85	NIMH: Research on Stress Reactivity in Adolescence
No Specific Deadline	NSF: Intergovernmental Program

Child, adolescent research

The National Institute of Mental Health (NIMH) offers a variety of grant awards with no specified deadlines under the program of Child and Adolescent Mental Health Research and Research Training.

Specific areas of interest include but are not limited to: Childhood depression, mental retardation, developmental disabilities, family processes, learning disabilities, sexual abuse, cultural/ethnic influences and television and technological influences on behavior.

For details, call the Office of Sponsored Research at x5030 or NIMH at (301) 443-5480.

Rudy Gawlik of the Department of Counseling talks with students during the Graduate School Information Day held Oct. 18 at Ely Center. The day-long program was sponsored by the Counseling and Placement Center, a unit of Student Affairs.

Four-week Open Season starts Nov. 5

Open Season will begin on campus Monday, Nov. 5 and will continue through Friday, Dec. 7. Open Season is that time of year when all permanent employees can either change health insurance plans or options, switch from a "self-only" enrollment to a "self and family" enrollment or sign up for a plan for the first time without restrictions.

During the four weeks of Open Season, permanent employees will be given the opportunity to review summaries of the new 1985 health coverages and compare plans in order to assure that their health insurance coverage is adequate in 1985.

At present, the Personnel Office does not know exactly how the 1984 coverages will change next year. A new plan comparison chart will be sent to members of the campus community

when that information becomes available.

The Personnel Office will sponsor two health benefit fairs this Open Season. Representatives from the various health plans will be on hand at both fairs and information concerning the health insurance programs will be made available to employees.

The first fair will be held Monday, Nov. 12 from 10 a.m. to 2 p.m. and the second Tuesday, Nov. 13 from 10 a.m. to 2 p.m. Both will be held in the Ely Center multipurpose room.

More information on Open Season will be published in an upcoming issue of *On the Green*. Anyone with questions should contact Kayt Lewis in the Personnel Office at x5113 (voice and TDD).

Alcohol, Drug Awareness Month set

The Division of Student Affairs has designated the month of November Alcohol and Drug Awareness Month at Gallaudet College. During the month, a number of activities — including a Chem-Free Fair — will be coordinated by the Student Affairs Alcohol and Drug Committee (SAAD).

In addition to the Nov. 7 Chem-Free Fair, a film festival night and peer advisers' program on responsible drinking are scheduled and are open to the Gallaudet community.

SAAD is chaired by Tina J. Breindel, a developmental educational specialist in the Office of the Dean of Student Affairs. The committee seeks to provide information on how to:

- provide accurate educational information concerning alcohol and other drug use and the physiological effects of its usage;
- make informed and responsible decisions with regard to alcohol and other drug use;
- identify on- and off-campus resources for assistance with drug-related problems;

DRCC schedules first open meeting of year

The Deafness Related Concerns Council (DRCC) will hold its first open meeting of the academic year Thursday, Nov. 1 at 4:30 p.m. in "Ole Jim."

The campus community is welcome to attend the meeting. The DRCC will share information about its future plans. Persons who want to voice any concerns they have are urged to attend the meeting.

- help organizations plan parties responsibly;
- educate persons about the responsibility of not driving after drinking;
- familiarize students on specific skills as to how to deal with an alcohol or other type of drug abuser; and
- encourage students to think about their reasons for drinking and/or for not drinking.

Details on the activities planned for Alcohol and Drug Awareness Month will be published in next week's *On the Green*.

Lee's address sets forth his goals, dreams for Gallaudet

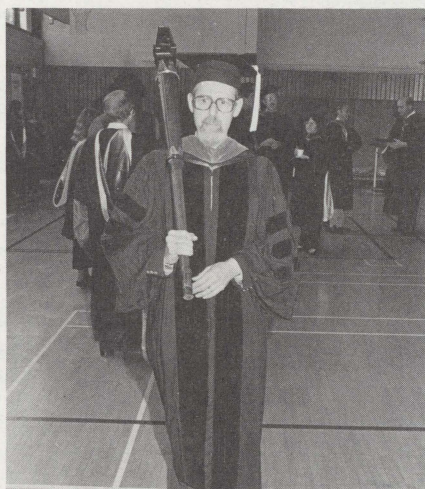

During his tenure as Gallaudet's sixth president, Jerry C. Lee hopes to lead Gallaudet to university status, set higher standards in education and services and respond effectively to the College's financial needs and responsibilities.

In his inaugural address, Lee outlined his goals and dreams for the College, saying that as he accepted responsibility for the leadership of Gallaudet he recognized "the tradition of progress to which I am heir and which I must perpetuate — a tradition that blends the richness of yesterday and the reality of today with the promise of tomorrow."

Gallaudet, he stated, is not only the "national and international pinnacle" in the education of deaf people, but is also a "nerve center" in which new ideas, new research and new insights are developed and disseminated nationally and abroad.

"I am determined that the College will continue to be the world's leader in the education of deaf people," he said. "It is my dream that by making optimal use of the latest developments in methods and technology, Gallaudet will rise to even greater heights of academic excellence; to more improvements resulting from deafness-related research; to further enhancement of the quality of life of all deaf people, their families, friends and the professionals who work with them; and to greater institutional cost-effectiveness that guarantees the taxpayer and our donors that their dollars are well invested.

"Finally," he continued, "it is my dream that Gallaudet College will move into its rightful place as a multipurpose university."

The mace, the symbol of the College's authority, was carried during the inauguration ceremony by Kurt Beermann, a professor in the History Department.

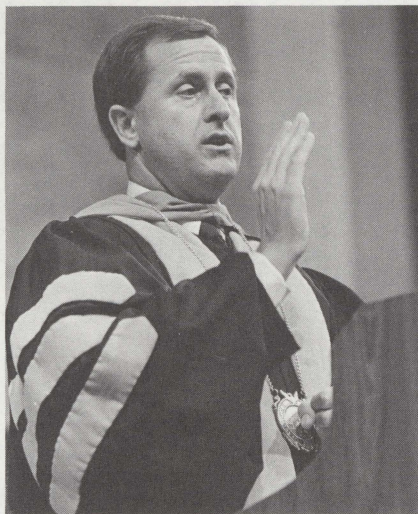

Toward the realization of that dream, Lee has set a number of goals which he believes are vital to the institution's well-being. Chief among his goals is the insistence on quality academic programs. "Gallaudet students should scale heights not attainable in other programs and acquire a level of knowledge, understanding and sensitivity that will enable them to lead enriched lives and pursue rewarding careers and further educational opportunities. We will, therefore, set realistic but appropriate standards and develop a clearly defined statement of student expectation for all academic programs. This goal requires that we be ever aware of changing conditions and technology — that we constantly review and revise, as appropriate, the admission requirements, the curricula and the nature and variety of programs offered at Gallaudet," he said.

To ensure the quality of its programs, Gallaudet must support a faculty "fully prepared to teach and to relate to students in their particular disciplines," Lee stated. "As a multi-versity, our curriculum must mirror the needs of a diverse student body: Students desiring the best elements of a liberal arts education, students who are career-oriented and students who desire an alternative to a baccalaureate program."

Saying that Gallaudet must serve new segments of the hearing-impaired community as well as those who work with these individuals, Lee said the College must develop appropriate ways to measure achievements and set goals of excellence in those new areas. At the same time, he added, the College must "preserve its traditions and improve standards for those programs which have worth and success of long-standing."

Pointing to Gallaudet's demonstration and dissemination programs, Lee said the goal in those areas "must be excellence.

"We must make certain (those programs) are of the highest quality and that they continue to be relevant to both traditional and mainstream set-

Jerry C. Lee gives the president's response during the Oct. 19 inauguration ceremony.

tings," Lee said.

As the primary source of public service to the nation's deaf community and professionals in related disciplines, Gallaudet must anticipate the needs of its national audience "in an effective and timely manner," he noted, continuing: "Our programs must be sensitive, flexible and well-adapted to the evolving needs of our external deaf audience, particular-

ly the increasing numbers of elderly and retired persons."

The College must also continue its research efforts in the area of language, communication and culture as aspects of accommodation to deafness, Lee said in presenting another goal. "We need to expand the proportion of research devoted to deafness prevention and hearing restoration. . . We must increase our efforts to transform research into practice and to ascertain that the results are widely applied by practitioners in the field."

Further, Lee stated that the College must "embrace new technology to enhance the quality of our instructional and dissemination capabilities. Computer hardware and software development, videotape systems and satellite utilization offer unlimited opportunities to innovative educators, and Gallaudet must boldly set the pace in making use of such technology."

Lee also listed as one of his goals the assurance that student life on campus continues to be as "enriching and stimulating" as possible. "As they seek knowledge and a set of individual values, our students need opportunities to participate in intercollegiate athletics, to enjoy the arts and to realize social and intellectual development through wholesome and barrier-free participation in clubs, organizations, fraternities, sororities, internships, travel and exchange programs."

In talking about the provision of quality educational services, Lee said that Gallaudet has the necessary resources and that those human, fiscal and physical resources must be continually evaluated to ensure that they are meeting the College's needs.

"Measurement of performance and cost effective management applications must be employed to assure our funding sources of a favorable return on their investment in the education of deaf people," Lee contended. "Our goal is an efficiency of operation in the management of both our educational programs and our support services that will be a paradigm for higher education."

Because members of the Gallaudet community continue to be the College's greatest resource, the College must maintain as one of its goals ensuring equitable personnel practices, Lee said. "It must provide significant opportunities for all personnel — faculty and staff alike — to grow in their capabilities and to be appropriately recognized for performance."

Achievement of those goals, Lee said, should enable the College to serve "not just the present generation of hearing impaired people but, I sincerely hope, future generations as well."

He went on to say that the goals can only be accomplished through the collective efforts of the Board of Trustees, the faculty, staff, students, alumni, the administration and the Congress, the state schools, the National Association of the Deaf and other organizations and donors and friends of Gallaudet.

"My dream is that we will work together, encouraging collegial cooperation and dissent, remaining ever conscious of the fact that we share a common mission," Lee stated.

Dr. and Mrs. Lee dance during a gala held Friday evening at La Fontaine Bleu in Lanham, MD. The celebration honored Dr. Lee, the College's sixth president.

Dr. and Mrs. Lee greet members of the campus community during a president's reception Friday afternoon at Chapel Hall. The reception was the first event to be held in the chapel of Chapel Hall since it was refurbished earlier this year.

understanding of the very complex world of the hearing impaired—not only here on Kendall Green but in the deaf community at large.”

In responding to Healy's prayer for Gallaudet, Spilman assured those in attendance that the Board of Trustees is “confident that the special magic which has been inherent in this institution for over 125 years will be preserved and nurtured by our sixth president, Dr. Jerry Carlton Lee.”

In their greetings to Lee, John Whalen, president of the Consortium of Universities of the Washington Metropolitan Area, said the Consortium would look to Lee for “vigor and leadership” while Michael Johnson of the Gallaudet Student Body Government expressed students' confidence in Lee's contributions and “exemplary leadership.”

Catherine Ingold, chair of the collegiate faculty, spoke for the collegiate and pre-collegiate faculties when she commended Lee for reaching out to the faculties to establish the rapport and communication “necessary for our collective undertaking.”

“Perhaps your single greatest challenge is the task of bringing us together so that the whole of our efforts exceed the sum of its parts,” she said.

Larry Forestal, president of the National Association of the Deaf, saluted Lee on behalf of deaf people in this country, adding that Gallaudet is fortunate to have at its helm a man whose “background, experience and knowledge” have prepared him for the “monumental task ahead.”

Gerald Burstein, president of the Gallaudet College Alumni Association, presented Lee a resolution from the GCAA Board expressing its appreciation for his “bold leadership” over the past several months. Burstein also presented Lee a GCAA membership card and pin, joking that “now you can begin paying your share of the dues.”

Lee was inducted Gallaudet's sixth president by Spilman and Merrill. “With reverence for our past, with a certainty of the rightness of our place in the present and, in your hands, a limitless optimism for our future, we entrust to you, Jerry Carlton Lee, this College,” Spilman said. “It is with pride and confidence that I present to you the medallion of our institution, the emblem of your authority.”

The national anthem and “America, the Beautiful” were sung by Francis Burton, with sign interpretations given by Larry Berke. The Rev. John Gigrich of St. Matthew's Cathedral in Washington, D.C. gave both the invocation and benediction. Brademas was introduced by Congressman David E. Bonior (D-MI), a member of Gallaudet's Board of Trustees. Beth King was the pianist for the processional and recessional.

Dance troupe to perform Oct. 30-31

Kol Demama, an Israeli professional dance troupe composed of deaf and hearing dancers, is appearing this week at the Kennedy Center Terrace Theatre. This premiere tour of the United States and Mexico is sponsored by the Kinneret Foundation which supports creative and performing arts in Israel.

Kol Demama is Hebrew for “sound and silence.” During the two Kennedy Center performances, the audience will view modern dance which integrates deaf and hearing dancers into a seamless combination.

In 1965 choreographer Moshe Efrati began working with Demama, a group of deaf dancers in Israel. He brought with him the experience he gained as a member of the “Bat Sheva” ensemble and as a Martha Graham student who incorporates both classical and modern dance forms into his work. With Demama his technique of direction and communication evolved into a vibra-

tional method of training and music notation. Yola Rozynek, a former performer with Demama and now an intern in the Performing Arts Department at MSSD, has been using components of Efrati's method with MSSD dance students.

Efrati merged a troupe of hearing dancers with the Demama group in 1978. Since that time the group has toured Israel and Europe with this unique contribution to the world of dance.

The Washington performances come at the beginning of the troupe's 12-city tour which will include performances in Dallas, New York City, New Orleans and Mexico City. The Kennedy Center engagement includes a workshop and demonstration of the troupe's technique on Tuesday, Oct. 30 at 2 p.m.

Tickets for the 7:30 p.m. Oct. 30 and 31 performances are available at the Kennedy Center box office.

Football team shuts out Shenandoah

The Bison football team won its first game of the season in an Oct. 20 home game against the Shenandoah Rangers. The Bison won by a 25-0 score.

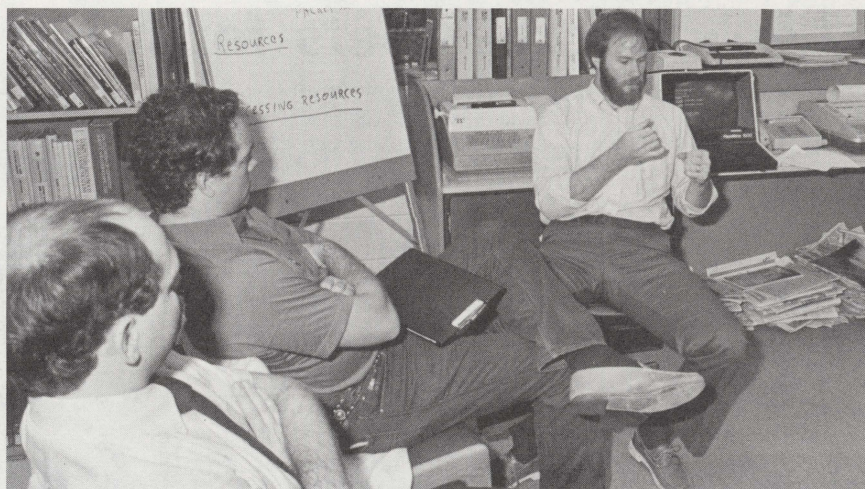

Rex Moers scored Gallaudet's first touchdown on a three-yard run early in the second quarter and rushed for another touchdown in the fourth quarter. John Maucer scored the other touchdown by hauling in a 60-yard pass from Mike Baer. Kevin Poore capped the scoring for the day with a 44-yard field goal, perhaps the longest field goal in Gallaudet history. The team is now 1-3 for the season.

The soccer team lost two games last

week, both shut-outs, and is now sporting a 7-4 record. The team lost to St. Mary's and Charles Community College by scores of 1-0 and 2-0 respectively.

The field hockey team split two games last week, losing to Notre Dame 3-1 and then defeating Goucher by the same score. The Bisonettes currently have a 3-4-1 overall record.

In MSSD sports, the Eagles defeated Quantico last Saturday, 34-13, to improve the team's record to 6-0-1. Sean Markel rushed for 144 yards in 23 carries and scored one touchdown on a seven-yard rush.

Michael Averett, at right, a science teacher at MSSD, leads a workshop entitled “MacIntosh for Teachers” during a day-long computer conference Oct. 18 at MSSD. The conference was open to MSSD faculty members and gave an overview of the Gallaudet computer system and the MSSD plan. Workshops during the day focused on instructional uses of computers.

“Ole Jim” lunch special set for Nov. 2

A lunch special — “Apples, Apples, Apples” — will be held at “Ole Jim” Friday, Nov. 2.

On the menu that day will be creamy apple soup; roasted cornish hen with pears and red wine sauce on a bed of wild rice and mushrooms; harvest cooked squash; apple juice; fruit salad with fresh apples, oranges,

grapes and raisins covered in sweet yogurt dressing; apple pie or Georgia pecan pie a la mode.

The cost of the luncheon, which will be served from 11:30 a.m. to 1:30 p.m. is \$5.25 a person. The deli bar will not be open that day. The salad bar will be open, with no price changes that day.
